Enerschalt – Your Partner in Modern Electrical and Mechanical Solutions

We are a team of experts who combine passion, professionalism, and the latest technologies to create electrical and mechanical solutions tailored to our Clients' requirements. We specialize in comprehensive projects – from design, through production, to installation and servicing of technical installations and devices for various industries, construction, and the energy sector.

Our capabilities allow us to operate across a broad spectrum – from industrial automation, electrical and mechanical installations, to advanced solutions for the energy, railway, maritime, agricultural, food, IT, and construction sectors. We focus on quality, timeliness, and a personalized approach to every order.

We Guarantee:

- » ***Comprehensive solutions – complete investment service in one place.***
- » ***Innovation – modern technologies and implementation of Industry 4.0 solutions.***
- » ***Quality – reliability of completed installations guaranteed.***
- » ***Flexibility – tailored approach to each client's needs.***
- » ***Experience and commitment – a team of highly qualified specialists ready to take on any technical challenge.***
- » ***We create the technologies of the future – for every industry. For your industry.***

Currently, we employ over 90 people at our production facility in Siedlce, where we operate 5 production halls, organized according to the specifics of the tasks – from small-scale cable assembly to complete internal wiring of new train cars, carried out on specialized transport frames.

For over a decade, we have partnered with railway vehicle manufacturers, handling both the construction and installation in new vehicles as well as providing electro-energy servicing of existing carriages and locomotives.

Working with us is a guarantee of success!
